Professional Summary

I am a Computer Science graduate with a strong foundation in Artificial Intelligence, Deep Learning, and Generative AI, dedicated to continuous learning and passionate about problem-solving and teamwork. I aim to leverage my skills in NLP, full-stack development, and software engineering in the tech industry, particularly in AI-driven applications.

Education

BS Computer Science

Aug 2022 – Jun 2026

National University of Computer and Emerging Sciences (NUCES)

Technical Skills

Languages: C++, C#, Python, JavaScript, HTML, CSS

Front-end: HTML5, CSS3, React.js

Databases: MongoDB, Oracle

Tools: Microsoft Visual Studio, VS Code, Git & GitHub

Operating Systems: Ubuntu, Kali Linux

Other Tools: Microsoft Word, Streamlit, Cloudinary

Experience

Front-End Developer Intern – Internn Craft (Remote)

Jun 2023 – Aug 2023

- Engineered responsive web interfaces using **HTML**, **CSS**, and **JavaScript**, ensuring cross-browser compatibility.

Teaching Assistant – NUCES-CFD Campus

- Theory of Automata
- CS1002 Programming Fundamentals
- CS3002 Information Security
- CS1004 Object Oriented Programming
- CS2005 Database Systems
- CS1005 Discrete Structures

Selected Projects

SmartAds (Final Year Project)

Jun 2026

- Built an AI-powered platform for logo, poster, and video generation using **Gemini API** and **Veo 3.1 API**.
- Implemented social media publishing and campaign analytics with a full-stack **Python**, **React**, and **MongoDB** architecture.

DiReCT – RAG for Clinical Diagnostics | (Team Project-NLP)

Dec 2025

- Designed a **Retrieval-Augmented Generation (RAG)** pipeline leveraging MIMIC-IV-Ext clinical datasets.
- Delivered context-aware clinical summarization through an interactive **Streamlit** application.

Fine-Tuning Transformer Architectures for Real-Time NLP | (Team Project-NLP)

Dec 2025

- Enhanced **BERT**, **GPT-2**, and **T5/BART** models for sentiment analysis, text generation, and summarization.
- Deployed real-time NLP solutions through an interactive **Streamlit** interface.

Quantum Leap Tech – Software House Website

Nov 2024

- Created a responsive software House website using **HTML**, **CSS**, **JavaScript**, and **MongoDB**.
- Embedded an LLM-powered resume generator for dynamic CV creation from user data.

Mini Operating System | (Team Project -Operating Systems)

May 2023

- Coded core OS modules for process scheduling and memory management, applying low-level system design principles.

Compiler-Based Dictionary | (Team Project-Data Structures)

Jan 2023

- Engineered a **C++** dictionary application using **Trie** data structures for efficient lexical indexing and lookup performance.

Achievements

- ICPC Algo Queen Cup 2024 – participated, demonstrating algorithmic problem-solving and teamwork.
- LeetCode – solved 255+ problems covering data structures, algorithms, trees, graphs, and dynamic programming; also competed in Weekly Contest 479.

Certifications

Applied Large Language Models (edX)

Front-End Development Internship Training (Intern Craft)

Developing Large Language Models (DataCamp)
